## CLEV2ER Land Ice and Inland Water

AO/1-11449/22/I-AG

### Software Release Note

[DD-SRN]

Ref: CRIS-TN-LIG-GS-5102

CLEV2ER-LIIW GPP Software Version 0.3.6

Prepared by:	The Consortium	11/7/2024
Issued by:	Alan Muir	11/7/2024
Checked by:	Malcolm McMillan	12/7/2024
Approved by:		

## Change Log

Issue	Author	Change	Status	Date
0.2.6	A.Muir	release of v0.2.6 of the GPP Software	Completed	29/6/24
0.3.6	A.Muir	release of v0.3.6 of the GPP Software for TC1	Completed	17/7/24

## Acronyms and Abbreviations

# 1 Introduction

## 1.1 Purpose and Scope

This is the Software Release Note for v0.3.6 of the CLEV2ER Land Ice and Inland Waters GPP software.

The purpose of a Software Release Note is to detail the delivered L2 GPP software version in terms of dependencies, known/solved problems and status with respect to its approved baseline.

# 2 Release Version Summary

**This Version: 0.3.6, release date: 8/7/2024**

Version 0.3.6 is a development release as part of Phase-1 of the CLEV2ER Land Ice and Inland Waters for Technical Checkpoint #1. As a development release it is not expected to be fully featured with respect to the full software requirements [RD-02] but is intended to demonstrate operation of the GPP's algorithm framework at Technical Checkpoint #1 with a few examples of scientific algorithms and a test harness.

# 3 Delivery Components

The GPP software is delivered in a number of different package options for:

- Native Install (on supported Linux OS).
- Docker Install.
- An external ADF/TDS package.

For both of these install options, there is also the option to install:

- Land Ice GPP only.
- Inland Waters GPP only.
- Both Land Ice and Inland Waters GPPs in one package.

The GPP packages for this release comprising of the above options are available for download from the project release portal:

**Release Portal:** [http://www.cpom.ucl.ac.uk/downloads/clev2er\\_liiw](http://www.cpom.ucl.ac.uk/downloads/clev2er_liiw)

Links within the portal are provided below for this release:

Install Type	File	Size
<b>Native Install</b>	<a href="#">clev2er_liiw_both-0.3.6.tar.gz</a>	82MB
	<a href="#">clev2er_liiw_li-0.3.6.tar.gz</a>	82MB
	<a href="#">clev2er_liiw_iw-0.3.6.tar.gz</a>	81MB

## 4 Installation

Software installation procedures are detailed in the CLEV2ER Land Ice and Inland Waters **Software User and Installation Manual** (DD-SUM), [RD-03]. The installation scripts for each install method are provided on the release portal.

## 5 Dependencies of this Version

This section defines the software and hardware dependencies of this release.

### 5.1 Software Dependencies

#### 5.1.1 Operating System Dependencies

This release is designed to install and operate on:

Operating System	Version
<b>Linux</b>	Any Linux released since 2020 Target release: Ubuntu 24.04 LTS
<b>MacOS*</b>	macOS >= 12.4

\*system tested on MacOS, but not a requirement, so only supported on a best effort basis.

#### 5.1.2 Docker Installation

For Docker installations of this software release all dependencies are pre-built in the container. For key dependencies used to build the Docker image please refer to the dependencies listed for a native installation.

Software Dependency	Version
<b>Docker</b>	Docker Engine or Docker Desktop installed >= version 26.1.3
<b>curl</b>	latest (>= 7.6) for downloading release packages

#### 5.1.3 Native Installation

For native installation (on supported operating systems) of the CLEV2ER GPP software for this release, the key software dependencies are:

Software Dependency	Version
<b>Python</b>	3.11.x
<b>Poetry</b>	latest (>= 1.8.3)
<b>curl</b>	latest (>= 7.6) for downloading release packages
<b>ncdump</b>	latest (optional), for verification/validation
<b>pv</b>	latest (optional). This optional package improves the installation progress readability.

Python package dependency requirements for this version are provided in the following table:

Package	Version
<b>affine</b>	2.4.0
<b>asciitree</b>	0.3.6
<b>attrs</b>	23.2.0
<b>cartopy</b>	0.22.0
<b>certifi</b>	2024.2.2
<b>cftime</b>	1.6.3
<b>click-plugins</b>	1.1.1
<b>click</b>	8.1.7
<b>cligj</b>	0.7.2
<b>codetiming</b>	1.4.0
<b>colorama</b>	0.4.6
<b>contourpy</b>	1.2.0
<b>cycler</b>	0.12.1
<b>envyaml</b>	1.10.211231
<b>fasteners</b>	0.19
<b>fonttools</b>	4.49.0
<b>imagecodecs</b>	2023.9.18
<b>imageio</b>	2.34.0
<b>kiwisolver</b>	1.4.5
<b>lazy-loader</b>	0.3
<b>matplotlib</b>	3.8.3
<b>netcdf4</b>	1.6.5
<b>networkx</b>	3.2.1
<b>numcodecs</b>	0.12.1
<b>numpy</b>	1.26.4
<b>packaging</b>	24.0
<b>pillow</b>	10.2.0
<b>pygments</b>	2.17.2
<b>pyparsing</b>	3.1.2
<b>pyproj</b>	3.6.1
<b>pyshp</b>	2.3.1
<b>python-dateutil</b>	2.9.0.post0
<b>pyyaml</b>	6.0.1
<b>rasterio</b>	1.3.9
<b>scikit-image</b>	0.22.0
<b>scipy</b>	1.12.0
<b>setuptools</b>	69.1.1

<b>shapely</b>	2.0.3
<b>six</b>	1.16.0
<b>snuggs</b>	1.4.7
<b>tifffile</b>	2023.12.9
<b>toml</b>	0.10.2
<b>types-toml</b>	0.10.8.20240310
<b>xmldict</b>	0.13.0
<b>zarr</b>	2.18.2
<b>snuggs</b>	1.4.7
<b>tifffile</b>	2023.12.9
<b>toml</b>	0.10.2
<b>types-toml</b>	0.10.8.20240310
<b>xmldict</b>	0.13.0

#### 5.1.4 Hardware Requirements of this Version

Each algorithm chain and related tools (gridding tool) have their own minimum recommended hardware (RAM, CPU, Storage) requirement, based on the resources they consume during processing. These have been measured for this release.

GPP Chain	Minimum Memory (RAM) per L1b file	Other Minimum Hardware Requirements	Criteria Used
<b>landice</b>	TBD	TBD	TBD
<b>landice_swath</b>	TBD	TBD	TBD
<b>inlandwaters</b>	TBD	TBD	TBD
<b>land ice gridding tool</b>	TBD	TBD	TBD

Note that the hardware specification used will affect the potential scalability of the GPP as far as multi-processing of a chain (the ability to process multiple L1b files in parallel).

## 6 Problems Solved in this Version

In this development version the CLEV2ER Algorithm Framework and sample algorithms for Land Ice (POCA and Swath) and Inland Waters have been completed. This release also includes the first version of the test harness.

## 7 Known Issues in this Version

As this is a development release, only a small subset of scientific algorithms defined in the ATBD [RD03] for the land ice and inland waters chains have been completed. No output algorithms to create L2 CRISTAL files have been created yet.

## 8 ADF/TDS Versions Included in this Release

In this section we detail the ADF and TDS files included in the GPP software package and additional ADF/TDS package (for large files or datasets > 1GB).

### 8.1 Common ADF

ADF are located in one of two locations referenced in the table.

GPP: \$CLEV2ER\_BASE\_DIR/testdata/adf/common

EXT: \$CLEV2ER\_BASE\_DIR/testdata\_external/adf/common

The location of testdata\_external is configurable during installation.

Type	File	Ver	Where	Source	Size
Physical Constants	CR_AX_GR_CST_AX_00000000T00000_99999999T99999_20240201T000000_____CPOM_SI_R_V01.NC	1.0	GPP	MSSL	4KB

\*in this development release, the ADF included is a small subset of the final required ADF.

## 8.2 Land Ice ADF

ADF are located in one of two locations referenced in the table.

GPP: \$CLEV2ER\_BASE\_DIR/testdata/adf/landice

EXT: \$CLEV2ER\_BASE\_DIR/testdata\_external/adf/landice.

The location of testdata\_external is configurable during installation.

Type	File	Ver	Where	Source	Size
<b>Antarctic Dilated Mask</b>	ant_dilated_grid_mask.nc	1.0	GPP	CPOM/ BedMachine	464KB
<b>Greenland Dilated Mask</b>	grn_dilated_grid_mask.nc	1.0	GPP	CPOM/ BedMachine	532KB
<b>Antarctic DEM: 100m Gapless</b>	GaplessREMA100.zarr GaplessREMA100_flipped.zarr	v2.0	EXT	MSSL Zarr post-processed from <a href="https://figshare.com/articles/dataset/Gapless-REMA100/19122212">https://figshare.com/articles/dataset/Gapless-REMA100/19122212</a>	5.7GB
<b>Antarctic DEM: 1km Gapless</b>	GaplessREMA1km.zarr GaplessREMA1km_flipped.zarr	v2.0	EXT	MSSL Zarr post-processed from <a href="https://figshare.com/articles/dataset/Gapless-REMA100/19122212">https://figshare.com/articles/dataset/Gapless-REMA100/19122212</a>	66MB

\*in this development release, the ADF included is a small subset of the final required ADF.

## 8.3 Inland Waters ADF

\$CLEV2ER\_BASE\_DIR/testdata/adf/inlandwaters

Type	File	Version	Source

\*in this development release, the ADF included is a small subset of the final required ADF.

## 9 Version History

Version	Date	Description
<b>0.3.0</b>	23/06/2024	Development release for TC1. Algorithm framework + sample algorithms. First version of test harness.
<b>0.3.6</b>	08/07/2024	Minor update to improve Docker build scripts.
